

BLUEBERRIES

ANTI-STRESS 550[®] is a non-toxic, biodegradable, water-based polymer coating which creates a semi-permeable, elastic membrane that reduces moisture loss in plants.

Benefits of applying **ANTI-STRESS 550[®]** to Blueberries:

- Reduces damage to bud, bloom and leaf tissue during periods of frost and freeze.
- Application at straw stage promotes berry growth and reduces splitting/cracking.
- Optimizes growth and nutrient utilization when temperatures exceed 95° F.
- Will not inhibit pollination.
- Allows for normal stomatic activity and does not interfere with photosynthesis.
- Allows for unrestricted plant growth permitting leaf and plant flexibility.

Application of **ANTI-STRESS 550[®]**:

- 1 -5 gallons of Anti-Stress 550[®] should be applied per 100 gallons of water, up to 5%.
- In advance of frost/freeze apply a 2%-5% solution.
- At straw stage, for increased size and to reduce splitting and cracking, apply a 2%-4% solution.
- At late summer flush apply a 1%-3% solution to maximize growth for next crop cycle.
- Anti-Stress 550[®] may be applied with most types of conventional farm, orchard or ground spray equipment.
- Sufficient spray pressure/volume must be used to dispense Anti-Stress 550[®] over and throughout the entire plant surface.
- Application is effective for 30 – 60 days. Will not wash off with normal rainfall.

Available in 2.5 gallon containers, 30 & 55 gallon drums, and 275 gallon totes.

Pesticide use permit not required / Applicators License not required
Anti-Stress 550[®] is exempt from reporting by California requirements
Not a Pesticide
