

Wichita Pecans

4 Months Post Planting

Non-Treated
Traditional Bare
Root Planting

Anti-Stress 550®
Treated

- Treated trees were dipped, including roots, in a 5% solution of Anti-Stress 550® upon receipt from the nursery.
- A 5% solution of Anti-Stress 550® was then applied with a hand wand after the trees leafed out.
- Non-treated trees were painted with white paint for protection and identification.
