

Christmas Trees

ANTI-STRESS 550[®] is a non-toxic, biodegradable, water-based polymer concentrate. When applied as a foliar spray, Anti-Stress 550[®] creates a unique semi-permeable, elastic membrane that reduces moisture loss and insulates plants.

Production benefits of applying **ANTI-STRESS 550[®]** to Christmas Trees:

- Does not block sunlight or reduce photosynthesis and allows normal stomatic activity.
- Reduce plant moisture loss and desiccation during summer heat and drying winds.
- Reduce tree stress between irrigation cycles.
- Allows for unrestricted plant growth permitting needle and plant flexibility.

Application of **ANTI-STRESS 550[®]**:

- One to five gallons of Anti-Stress 550[®] should be applied per 100 gallons of water.
- Summer: 1st application in late May with re-application in July or 1st application in late June/early July, prior to temperatures rising above 95°.
- Winter: Apply in December or prior to winter burn conditions.
- Application timing should allow Anti-Stress to dry before temperatures reach freezing.
- Anti-Stress 550[®] may be applied with most types of conventional farm, orchard or ground spray equipment.
- Sufficient spray pressure/volume must be used to dispense Anti-Stress 550[®] over and throughout the entire tree surface.
- Prior to any treatment, trees should be well watered.
- Thorough coverage is critical.
- Application is effective for 30 – 60 days.

Available in 2.5 gallon containers, 30 & 55 gallon drums, and 275 gallon totes.

Pesticide use permit not required / Applicators License not required
Anti-Stress 550[®] is exempt from reporting by California requirements

Not a Pesticide
